Art Unit: 1761

Examiner's Amendment

In order to correct obvious informalities, pursuant to MPEP 1302.04, the following changes have been made by the Examiner:

1. In claim 29, line 5, "the", first occurrence, has been changed to -- a -- (note that no antecedent basis has been established in claim 29 for "the feeding direction" appearing on line 5).
2. The title has been changed to read -- Method for supplying food dough --.

Prior Art Citation

The Kempf patent is cited to show a method for controlling the weight of cut pieces of dough.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The prior art of record does not show or suggest the present method for supplying food dough set forth in claims 29 and 30, wherein the sheet of the food dough is supplied to first and second weighing conveyors serially located along a feeding direction or a plurality of first weighing conveyors arranged in parallel for measuring the weight of a part of the sheet, and the part of the sheet is cut when the sum of the measurements of the first and second weighing conveyors or the measurement of the second weighing conveyor corresponds to a preset value or the sum of the measurements of the second weighing conveyors corresponds to the preset value.
